with T.E.E.N.!**

The Transportation Education & Economic Network (T.E.E.N.) was formed in 2005 by a group of transportation fleet companies, both national and local, who wished to address human resource shortages and retention issues specifically for commercial driver operator occupations. Recognizing the key traits necessary for all L&T operations, the T.E.E.N has instituted a network for seeking experienced workers and entry level trainees in Trucking, Warehousing, Mechanics, Dispatch, Management and more.

Some of T.E.E.N.'s accomplishments include:

- Successfully trained over 2000 PA residents employed by 30 different Logistics and Transportation businesses.
- Established a pipeline for entry-level recruitment through a community awareness campaign.
- Developed the 1st Seat Driver Training Curriculum and corresponding Competency Attainment Report.
- Identified Career Lattices/Ladders, industry trends, needs analysis and gap survey.
- Created a DVD to educate youth about the career opportunities
- Encouraged and aided in the development of registered apprenticeship programs.
